National Park "Unteres Odertal"

Fürstenberg near Eisenhüttenstadt

### ...experience full enjoyment.

The Oder-Neiße Cycling Route follows along the two rivers and through three countries the Czech Republic, Poland and Germany. The cycling route stretches almost the entire length of the German-Polish border. It ventures 630 kilometres from the spring of the Neiße River in Nová Ves in the Czech Republic to the tourist city of Ahlbeck on the island of Usedom. It follows from the Jizera Mountains along the borderline all the way up North to the Baltic Sea. Where Europe was once divided, the borderlines nowadays are blurred. On the top of the seawalls, the visitors gaze breathtaking views over the boundless landscape with a never-ending high blue sky. The wet meadows along the Oder River are a paradise for storks and breeding places for ground-nesting birds. Large parts are protected areas, a precious habitat for a fauna and flora, which seldom can be found somewhere else. Attractions along the way are characterized by the Sorbian culture and way of life.

#### Monasteries, Emperors and Colonists villages

Great medieval trading centres such as Zittau and Görlitz combine architectural influences from Bohemia, Silesia, Brandenburg and Saxony. Today, lovingly renovated old towns shine in new splendour. Sightseeing hotspots along the cycling path include the stunning landscape gardens of the UNESCO world heritage site Fürst Pückler's Park in Bad Muskau. The park is also a symbol of cross-border integration, since two-thirds are in Poland and one-third is in Germany. The Lusatia region is characterized by the open-pit mining of the past. The Socialist planned city of Eisen-

hüttenstadt gives an excellent insight of the recent history and urban planning in the region. The old Hanseatic city of Frankfurt/Oder offers magnificent historical monuments of the North German Brick Stone Gothic. Travelling further north, the landscape is characterized by colonists villages and historic towns but mainly dominated by the permanently changes of the picturesque floodplain of the Oder River. The seaside resorts Usedom form a truly imperial finish.

#### Paddle and Pedals

Highly recommended is a change from the top of the dike crest down into the worm's eye perspective: Take a canoe trip and discover new perspectives of the beautiful landscape. The sound of the water is suddenly very close and the dense canopy offers protection from the world up there. Whilst the bicycles and luggage are brought to the next destination, you can enjoy the vastness of the pristine nature, watching it disappear behind the next river bend. It is peaceful and adventurous at the same time.

#### Original and regional

The Oder-Neisse Cycle has not only stunning landscapes and historical sights to see, but also culinary delights to offer. Treat yourself, with regional specialities such as Goat's cheese, quality wine from the region, fish fresh off the boat, Nudln or Salami, and local beers from the monastery brewery. Best conditions for an unlimited connoisseur tour, here is something for everybody!

### Great diversity ...

The Neiße River rises in the Nová Ves/Czech Republic and blithely runs from the Jizera Mountains through a densely forested valley towards the Zigauer basin. Further downstream the river turns into white water – a good opportunity to take a break from cycling. Enjoy white water rafting or canoeing before continuing the journey towards the sea. Magical views, shady forests and stunning river sceneries ...

Canoeing in the Oderbruch

### Natural Beauty ...

Discover the natural beauty along the Oder-Neisse cycling route: the romantic valley of the Neisse, the meadows of the Oderbruch, the Haff coast or the hilly landscape of the Uckermark. Enjoy the great diversity of the flora and fauna.

Geopark Muskauer Faltenbogen

Find special places where orchids and Adonis bloom in the wild. Storks in the wetlands or thousands of cranes on their way south are an impressive natural spectacle.

### Of mighty kings and princes ...

The history along the two rivers was colourful. The splendour of beautiful old towns and manorial parks tell the stories of the past. Examples include Germany's oldest Cistercian convent and the Baroque style monastery Neuzelle. The cycling route offers an abundance of highlights along the way. Visit the castles and ruins of the past and slip into the role of a brave prince or a mighty king. Surrounded by imposing landscapes,

Castle at Bad Muskau

historical villages are testimonies of Friedrich the Great "Old Fritz". Explore the omnipresent witnesses of the Hanseatic League, which are evidence of former wealth and power of the cities.
